Fred:  
Some field folks said they would do it, but in order to make that commitment the region and headquarters have to review the request which is underway. So apparently the field folks told the residents on Saturday the review was still underway. This has been reported in the press as Sandra has presented, but the reality is the field folks had no authority to make those promises.

Sandra just spoke at this conference. She also mentioned that EPA agreed to provide water to affected residents in Dimock last Friday, and then reversed its decision on Saturday. Is this correct?

I have a call and email into Tom Sinks, my analog at NCEH/ATSDR.

I assume this is work ATSDR has done for the Regions (e.g., in Region 8, which led to the recommendation to provide bottled water in Pavillion), and not results from the ongoing retrospective case studies in the ORD HF study.

I just reviewed the ppt and they present some of the findings from some of the site specific work they have done for EPA in OH, WY and PA. Bottom line: it provides detailed info on chemicals found in water supplies and makes recommendations that for at least 2 sites (and specific wells in the locations) bottled water is provided. This is being provided at a conference.
